

Glutton™ Aspiration Catheter

The Glutton™ Aspiration Catheter is intended for use in the revascularization of patients with acute ischemic stroke secondary to intracranial large vessel occlusive disease (with the internal carotid, middle cerebral – M1 and M2 segments, basilar, and vertebral arteries) within 8 hours of symptom onset.

Hybrid Structure of Coil and Braiding,
BALANCED KINK RESISTANCE AND TRACKABILITY.

LARGE LUMEN 0.072"
for aspiration, capture large clot

FEATURES & BENEFITS

- - Hybrid structure of coil and braiding, combined flexibility and maneuverability;
- - Larger inner diameter lumen, higher aspirating efficiency;
- - Distal multi-segment design of gradual hardness;
- - Proximal composite polymer enhanced pushability;
- - Compatible with 6F long sheath;
- - Hydrophilic coating on the distal segment easily reach distal vessels / occlusions.

Order Information:

Catalog No.	Fr. Size	Inner Diameter (inch)	Outer Diameter (inch)	Effective Length (cm)
